Risk Management
Health & Safety Compliance
Human Resource Management
Chemical Management

The **Digital:Framework** suite of products focus on effective risk management, health, safety and environmental compliance and human resource management. Used extensively in the oil industry since 2001, the upgraded product is now available for use in all business sectors.

- > Manage your most important resource effectively and safely
- > Allow all risks to be viewed and compared within one system
- > Allow compliance with Health, Safety and environmental requirements
- > Provides a fully flexible and configurable system
- > Increases visibility and control
- > Reduces administrative cost and risk
- > Allows multi-location, multi-user hierarchical access
- > Tracks and highlights problem areas
- > Assigns and targets corrective actions with one click
- > Communicates your risks and safety levels effectively to all stakeholders

Digital:Risk Management

Created with the leading seven UK oil companies to meet the petrol retail and forecourt business area needs, Risk Management module enables fast and cost effective:

- > OPERATIONAL RISK ASSESSMENTS
- > RISK REDUCTION TRACKING OVER TIME
- > TASK BASED RISK ASSESSMENTS
- > TASK ALLOCATION
- > TRAINING REGISTER
- > PPE ISSUED REGISTER
- > ACCIDENT / INCIDENT TRACKING
- > AUDIT TRAIL

Industry specific versions with embedded risk assessments are now available for:

- > PETROL FILLING STATIONS
- > FUEL STORAGE & DISTRIBUTION
- > HOTELS, BARS & RESTAURANTS
- > LEISURE CLUBS & FACILITIES
- > OFFICES
- > DISTRIBUTION CENTRES
- > INDUSTRIAL MANUFACTURING FACILITIES

Digital:Contractor Management

An extension of Risk Manager, the module allows all contractor risks to be collated into one area – without you having to do the work. Specific access through unique log-ins allows all your contractors to provide their risk assessments directly into the system.

All contractor risk assessments can be executed, logged and approved prior to access being granted to site. Past assessments are used to suggest hazards and control measures – saving time and effort.

Digital:Chemical Management

Digital:Framework have partnered with **Gaia** of Finland to produce an innovative solution for practical, simple, fast and consistent chemical risk management. Tailored to support your corporate policy and risk management approach. The data requirement is kept to a minimum and the chemical hazard and risk assessment results are displayed as configurable, easy to communicate colour codes, numeric values or symbols.

The module allows you to:

- > Set targets and thresholds for hazard and risk categories
- > Define management actions
- > Reduce risk and find suitable alternatives
- > Track risk before and after risk management measures are applied
- > Meet compliance requirements
- > Monitor performance
- > Track improvement over time

Digital:HR

An extensively revised tool developed for a major oil company.

The module includes:

- > Time sheeting
- > Payroll
- > Training
- > Accident recording

It is currently in use to pay over 3000 Petrol Filling Station staff in the UK & the Netherlands. Full details of each member of staff are easily recorded and maintained – Keep track of all training and qualifications and know instantly what risks any lapsed or lacking qualifications impact on. The system also includes a facility for recording risk awareness through electronic signing.

Digital:Recruitment

Carry out your entire recruitment process online. The system is ideal for large companies with multiple sites where applicants can check on vacancies nationwide or within a certain distance from their home location. The system is now live for all BP petrol stores in the Netherlands. Through the public facing system – vacancies and content are managed automatically from the **Digital:Framework** intranet system. See [https:// vacatures.bp.nl](https://vacatures.bp.nl)

Digital:Insurance Solutions

A platform for the consistent delivery of year on year insurance premium savings – **Digital:Framework** has joined forces with **The Insurance Partnership** and by combining the **Digital:Framework** system with earnings transparency, we consistently demonstrate that this unique business model delivers cost savings in excess of 20%.
